

Functional & Performance Testing

Date	Team ID	Project Name
30 September 2026	SWTID-2026-9981	PocketSmart AI: Your Smart Budget & Recommendation Assistant

Functional Testing

Test Case ID	User Story	Scenario	Test Steps	Expected Result	Actual Result	Pass / Fail
TC-01	USN-1	Register with valid details	Open sign-up; enter name, unused email and password; submit	Account is created and the user is taken to login	Account created and login page opened	Pass
TC-02	USN-1	Register with existing email	Register again using the same email	Error message: email already registered	Error message displayed; no duplicate account	Pass
TC-03	USN-2	Login with wrong password	Enter valid email and wrong password	Login fails with clear error message	Error message displayed	Pass
TC-04	USN-3	Save income and savings goal	Enter income 8000 and goal 1500; save	Values saved and shown on dashboard	Values displayed on dashboard	Pass
TC-05	USN-4	Add a valid expense	Enter amount 250, date, description 'swiggy dinner', mode UPI; save	Expense appears in list and totals update	Expense listed and total updated	Pass
TC-06	USN-4	Add expense with empty amount	Leave amount blank and save	Validation message; expense not saved	Validation message displayed	Pass
TC-07	USN-5	Delete an expense	Delete an existing expense	Expense removed; totals and charts update	Expense removed and charts refreshed	Pass
TC-08	USN-6	Automatic categorisation	Add expense 'bus pass monthly'	Category suggested as Travel	Travel suggested and editable	Pass
TC-09	USN-7	80 percent budget warning	Set Food limit 1000; add Food expenses totalling 850	Warning that 80 percent of Food budget is used	Warning displayed	Pass
TC-10	USN-7	Over-budget alert	Add Food expenses beyond 1000	Over-budget alert displayed	Over-budget alert displayed	Pass
TC-11	USN-8	Dashboard charts	Open dashboard after adding expenses in 3 categories	Pie chart and monthly bar chart match the data	Charts matched stored data	Pass
TC-12	USN-9	CSV import with one bad row	Upload CSV of 10 rows where one row has a text amount	9 rows imported; bad row reported with reason	9 rows imported; error reported for 1 row	Pass
TC-13	USN-10	Recommendations within budget	Open recommendations with Rs. 500 remaining	Suggestions relevant to spending and priced within Rs. 500	Suggestions relevant and within Rs. 500	Pass

Test Case ID	User Story	Scenario	Test Steps	Expected Result	Actual Result	Pass / Fail
TC-14	USN-10	LLM service unavailable	Disconnect network and request recommendations	Friendly message and rule-based saving tip shown	Message and fallback tip displayed	Pass
TC-15	USN-11	Chat question on own data	Ask 'How much did I spend on food this month?'	Answer equals the Food total in the expense list	Answer matched expense list	Pass
TC-16	USN-12	Export monthly CSV	Click download report for current month	CSV downloads containing all expenses of the month	CSV downloaded with all rows	Pass
TC-17	USN-13	Open deployed application	Open the public application link on a phone browser	App loads and layout fits the screen	App loaded; layout fitted screen	Pass

Performance Testing - Test Plan and Targets

Test ID	Parameter	Test Scenario	Target
PT-01	Dashboard load time	Open dashboard with 500 stored expenses	About 3 seconds or less
PT-02	Categorisation response time	Add a single expense and wait for the category	About 2 seconds or less
PT-03	Recommendation response time	Request recommendations with a normal spending summary	About 8 seconds or less
PT-04	CSV import speed	Import a file with 1,000 rows	About 10 seconds or less
PT-05	Concurrent usage	10 users use the app at the same time	No errors; pages respond normally
PT-06	Model accuracy	Run classification report on the 20 percent test split	Accuracy of at least 85 percent

Performance targets are the acceptance criteria set by the team. Measured values are recorded during the test run.
