

Brainstorming & Idea Prioritization

Date	Team ID	Project Name
30 September 2026	SWTID-2026-9981	PocketSmart AI: Your Smart Budget & Recommendation Assistant

Team Details

S.No	Name	Role
1	K Devishree	Team Leader
2	Pon Sujatha M	Team Member
3	Karpagam N	Team Member
4	Deepika M	Team Member
5	Brindha K	Team Member

Step 1: Problem Statement

Parameter	Details
Problem	Students, young professionals and families find it hard to track daily spending, stay within a monthly budget and decide what to buy without overspending. Most budgeting tools only record expenses; they do not give personalised guidance.
Who is affected	Individuals with a fixed monthly income who manage money through UPI, cards and cash and have no simple way to see where the money goes.
Goal	Build PocketSmart AI, a smart budget and recommendation assistant that records expenses, categorises them automatically, warns about overspending and suggests budget-friendly choices.

Step 2: Brainstorm and Idea Listing

Idea ID	Idea	Description	Contributed By
I-1	Manual expense tracker	Simple form to add expenses and view a running total.	Deepika M
I-2	Auto expense categorisation	Machine learning model that reads the expense description and assigns a category.	Karpagam N
I-3	Category-wise budget limits with alerts	User sets a limit per category; app warns at 80 percent and 100 percent.	Brindha K
I-4	Visual spending dashboard	Pie and bar charts for category-wise and monthly spending.	Pon Sujatha M
I-5	AI recommendation engine	LLM suggests saving tips and cheaper alternatives based on spending pattern and remaining budget.	K Devishree

Idea ID	Idea	Description	Contributed By
I-6	Chat assistant for finance questions	User asks questions in plain language and gets answers from own data.	K Devishree
I-7	Savings goal planner	User sets a goal amount and date; app shows the monthly saving needed.	Pon Sujatha M
I-8	Bill and subscription reminder	Reminder for recurring bills and subscriptions.	Brindha K
I-9	Bank account auto-sync	Automatic import of transactions from bank accounts.	Karpagam N

Step 3: Grouping of Ideas

Theme	Ideas Grouped	Purpose
Track	I-1, I-4, I-9	Record spending and show it clearly.
Control	I-3, I-7, I-8	Plan and protect the budget.
Understand	I-2, I-6	Turn raw expenses into meaning using AI.
Recommend	I-5	Give personalised guidance that improves decisions.

Step 4: Idea Prioritization (scale 1 to 5; higher is better, except Effort where lower is better)

Idea ID	Idea	Impact	Effort	Feasibility	Decision
I-1	Manual expense tracker	4	1	5	Selected - core feature (Sprint-1)
I-2	Auto expense categorisation	5	3	4	Selected - core AI feature (Sprint-2)
I-3	Budget limits with alerts	5	2	5	Selected - core feature (Sprint-2)
I-4	Visual spending dashboard	4	2	5	Selected (Sprint-2)
I-5	AI recommendation engine	5	3	4	Selected - key differentiator (Sprint-3)
I-6	Chat assistant	4	3	4	Selected (Sprint-3)
I-7	Savings goal planner	3	2	5	Selected in basic form (savings goal on profile)
I-8	Bill and subscription reminder	3	3	3	Future scope
I-9	Bank account auto-sync	5	5	1	Future scope - needs bank API approvals

Outcome: Ideas I-1 to I-7 form the PocketSmart AI scope. I-8 and I-9 are recorded as future enhancements.
