

Customer Journey Map

Date	Team ID	Project Name
30 September 2026	SWTID-2026-9981	PocketSmart AI: Your Smart Budget & Recommendation Assistant

Persona: Priya, 21, final-year college student with a monthly allowance of Rs. 8,000 and part-time tutoring income. She pays through UPI and cash and often runs out of money before month end.

Stage	User Goal	User Actions	Touchpoints	Emotions	Pain Points	Opportunities with PocketSmart AI
Awareness	Find an easy way to control spending	Hears about the app from friends and social media; searches for budgeting help	Social media, friends, college groups	Curious, hopeful	Existing apps look complicated or need bank access	Clear one-line message: track, control and save with AI
Onboarding	Start using the app quickly	Opens app, registers, enters monthly income and savings goal	Sign-up and profile screens	Slightly unsure, then relieved	Long forms discourage users	Short sign-up and a two-field profile setup
First Use	Record expenses without effort	Adds expenses; uploads old data as CSV	Add-expense form, CSV upload	Motivated	Tagging each expense is tiring	Automatic categorisation from the description
Regular Use	Stay within budget	Sets category limits, checks dashboard, reads alerts	Dashboard, budget page, alerts	In control, sometimes worried	Realises overspending too late	Alerts at 80 percent and 100 percent of each limit
Decision Making	Buy sensibly with limited money	Asks the assistant what to buy or how to save this month	Recommendation page, chat assistant	Confident	No guidance on cheaper alternatives	Personalised, budget-aware suggestions
Retention	Build a saving habit	Reviews monthly summary, downloads report, adjusts goals	Monthly summary, CSV export	Satisfied, proud	Loses interest if there is no visible progress	Progress towards savings goal and monthly insights
