

Solution Requirements

Date	Team ID	Project Name
30 September 2026	SWTID-2026-9981	PocketSmart AI: Your Smart Budget & Recommendation Assistant

Functional Requirements

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration & Profile	Register with name, email and password; log in and log out; store monthly income and savings goal.
FR-2	Expense Management	Add, edit and delete expenses; record amount, date, description and payment mode; import expenses from CSV.
FR-3	Smart Categorization	Suggest a category for every expense using a trained model; let the user override the category.
FR-4	Budget Planning & Alerts	Set category-wise monthly limits; show warning at 80 percent and over-budget alert at 100 percent.
FR-5	Spending Insights	Show category-wise pie chart, monthly trend chart, total spent, total saved and remaining budget.
FR-6	AI Recommendations	Generate personalised saving tips and budget-friendly product or alternative suggestions using the spending summary and remaining budget.
FR-7	Ask PocketSmart Chat	Answer plain-language questions about the user's own spending data.
FR-8	Report Export	Download the monthly summary as a CSV file.
FR-9	Deployment & Administration	Host the application online; admin can view basic usage statistics.

Non-Functional Requirements

NFR No.	Non-Functional Requirement	Description
NFR-1	Usability	Clean, mobile-friendly interface that a first-time user can operate without training.
NFR-2	Security	Passwords are stored as salted hashes; each user can access only their own data; API keys are kept out of source code.
NFR-3	Reliability	Application handles invalid input, empty data and API failures with clear messages instead of crashing.
NFR-4	Performance	Dashboard loads in about 3 seconds; categorisation responds in about 2 seconds; AI recommendations respond in about 8 seconds.
NFR-5	Availability	Application is accessible through a public link at any time, subject to the hosting platform's uptime.
NFR-6	Scalability	Modular design allows a move from SQLite to a cloud database and support for more users later.
NFR-7	Privacy	Only the data the user enters is used; no bank credentials are collected.
